Members of Norwich society are highly diverted over an incident in connection with the present visit to one of the finest of New York hotels of the two children of a prominent family, the girl 4 and the boy 6. Their only experience of hotel life had been at a simple island inn during the summer; and when they were seated at the table in the big, glittering dining room, their mother, puzzled amid such luxury to know just what to choose for their dinner, at last inquired what they would like. With great energy and with one voice they responded "baked beans!"

Court of common pleas came in at New London Monday morning to try the case of S. Margolis against John Hodema to recover a loan of \$26. The plaintiff alleged that in various sums he loaned Hodema the money, which the latter refused to pay, claiming that Margolis owed him \$47 for labor, of which \$26 was paid him on account. Margolis claims that Hodema was working for him as a loan and not in payment for labor.

Former Senator Thomas J. Spellacy has stated that he would prepare a bill for introduction in the general assembly, which would forfeit the right of suffrage to those who neglect it to the extent of not voting in a state or national election, unless possessing national election, unless possessing one of several valid excuses which would be specified. From the view-point of campaign management, the senator said, it was ridiculous that the parties should expend thousands of dollars in maintaining party machinery, and so large a percentage of the voters show their complete indif-ference by refusing to vote. The senator said he would spend some time in investigating the laws

of various states in regard to the penalties for failure to vote, but he doubted that any state provided for the loss of citizenship. When over 20 per cent of the registered voters of the state neglect to cast their ballots despite the easy methods of lots despite the easy methods of transportation provided in the large centers by the party committees at party expense, he considered it high that there should be legislative

To place it at the lowest possible calculation, 230,000 on November 3, the neglect of 50,000 citizens of the state of Connecticut to exercise their franchise is at once apparent.

### What Thin Folks Should Do To Gain Weight

Physician's Advice For Thin, Unde-veloped Men and Women

Thousands of people suffer from excussive thinness, weak nerves and feeble stomachs who, having tried advertised flesh-makers, food-fads, physical culture stunts and rub-on creams, resign themselves to lifelong akinniness and think nothing will make them fat. Yet their case is not hopeless. A recently discovered regenerative force makes fat grow after years of thinness, and is also unequalled for repairing the waste of sickness or faulty digestion and for strengthening the nerves. This remarkable discovery is called Sargol. Six strength-giving, fat-producing elements of acknowledged merit have been combined in this peeriess preparation, which is endorsed by eminent physicians and used by prominent people everywhere. It is absolutely harmless, inexpensive and efficient. is absolutely harmless, inexpensive and cfficient.

A month's systematic use of Sargoi should produce flesh and strength by correcting faults of digestion and by supplying highly concentrated fats to the blood. Increased nourishment is obtained from the food caten, and the additional fats that thin people need are provided. Lee & Osgood and other leading druggists supply Bargol and say there is a large demand for it.

While this new preparation has given splendid results as a nerve tonic and vitalizer, it should not be used by nervous people unless they wish to gain at least ten pounds of flesh.
